EDUCATION

Manipal University Jaipur

Bachelor of Technology in Computer Science; **CGPA: 9.29/10.00**

Jaipur, India

Aug. 2023 – Jul. 2027

St. Paul's School

Grade 12 (ISC); Percentage: 87.8%

Rampur Hat, India

Mar. 2020 – Jun. 2022

TECHNICAL SKILLS

Computer Science Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Languages: JavaScript, TypeScript, C++, Java, C#

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express, REST APIs, WebSockets

Database & Storage: PostgreSQL, Redis, Data Storage Concepts

DevOps & AI/ML: GitHub, Docker, Kubernetes, AWS, Gemini API, Hugging Face

EXPERIENCE

Samsung Electro-Mechanics

C# Full Stack Intern

Bangalore, India

Jun 2026 – Present

- Developing and optimizing enterprise-level applications utilizing C# and ASP.NET.
- Collaborating within a cross-functional team environment to design, build, and maintain scalable software solutions.

Hewlett Packard Enterprise (HPE)

Career Preview Program

Remote

Feb 2026 – Present

- Engaging in an intensive 6-month career preview program, focusing on enterprise software engineering principles and modern development workflows.
- Analyzing and solving technical challenges, gaining exposure to industry-standard tools, system architecture, and collaborative problem-solving methodologies.

AW3 Technology, Inc.

Software Engineering Intern

Remote

Dec 2025 – Jan 2026

- Revamped the AI Intercom widget by implementing a robust system of over 20 configurable features, including custom AI personalities, business scheduling, secure file attachments, and advanced visual customization.
- Developed and integrated a global server-side search feature, accelerating prospect discovery and improving overall search efficiency by 20%.
- Optimized UI/UX flows, contributing to improved user retention and smoother onboarding experience.

PROJECTS

StackIt - AI-Powered QnA Platform | React, Node.js, PostgreSQL, Prisma, Hugging Face

- Engineered a full-stack QnA web application enabling users to post, answer, and search technical questions.
- Integrated Hugging Face API to auto-generate intelligent question suggestions, improving engagement and reducing duplicate entries by 30%.
- Built a reputation system with upvoting/downvoting logic to increase community interaction.
- Implemented secure authentication and RBAC (Role-Based Access Control) for moderators and admins.

EcoSync CodeSense - Local Semantic Search Engine | React, Node.js, LanceDB, AMD Ryzen AI

- Developed a 100% offline, privacy-first semantic code search engine for the AMD GPU, optimizing vector retrieval using LanceDB.
- Engineered the system to run locally on an NPU/iGPU, eliminating cloud dependency and resulting in a 95% reduction in energy consumption compared to traditional LLM search tools.
- Built a full-stack interface with React and Node.js (Express) to seamlessly query and index local codebases with zero latency.

AWARDS

Dean's List: Awarded in 1st, 2nd, 3rd and 4th semesters for consistently securing 9.0+ GPA.

3rd Position: Swap Board organized by MUJ ACM Chapter.
